Akash Enclave, Lucknow

harshawasthi2023@gmail.com

ABOUT ME

Detail-oriented and tech-driven Computer Science student. Interested in building real-world applications and improving problem-solving abilities. Eager to contribute to a dynamic team and learn from industry projects. Have expertise development abilities major focusing on front end development..Eager to learn new things and have opportunities in work place

EDUCATION

KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY
BTECH - CSE Cgpa - 7.6

2023-2027

LUCKNOW PUBLIC SCHOOL

CLASS - XII 82%

2022-2023

LUCKNOW PUBLIC SCHOOL

CLASS - X 91%

2020-2021

SKILL

- Front End Developer
- MySQL
- Python
- Database Management
- OOPS
- Machine Learning
- React
- C++
- API's
- Git & GitHub

PROJECTS

MACHINE LEARNING PROJECTS :-

SPAM EMAIL DETECTION Checker

Research Project | Python, NLP

- Designed and implemented a machine learning-based spam email detection system using Natural Language Processing (NLP) techniques.
- Applied text preprocessing methods including tokenization, stop-word removal, stemming, and TF-IDF vectorization.
- Trained and evaluated multiple classifiers such as Naive Bayes, Logistic Regression, and Support Vector Machine (SVM).

Smart Footwear for Visually Impaired Using Machine Learning

ML Project | Python, Sensors

- Developed a smart footwear system to assist visually impaired users with real-time obstacle detection.
- Integrated ultrasonic, IR, and pressure sensors to collect environmental and ground-level data.
- Applied machine learning classification models on sensor data to detect obstacles and walking conditions.
- Implemented vibration-based feedback to alert users of nearby obstacles

Projects:-

Job Portal Frontend Application

React, JavaScript, HTML, CSS

- Developed a responsive job portal frontend using React with reusable and modular components.
- Implemented job listing, job details, and apply job UI using React Router.
- Integrated REST APIs to dynamically fetch and display job data.
